

AdrenaVen™

Premier
Adrenal Support

AdrenaVen™ offers a one-of-a-kind formulation for energy-boosting, stress-regulating adrenal support. When you experience stress, your adrenal glands release high levels of hormones called cortisol and adrenaline. Excessive exposure to these stress hormones can put you at risk for issues such as anxiety, sleeplessness, digestive issues, headaches, and heart disease. AdrenaVen™ is designed to interrupt an overactive stress response by providing adrenal-nourishing fermented cordyceps and bioactive botanicals.*

Cordyceps are a mushroom-like fungus that have been used in ancient Chinese medicine for centuries. Cordyceps possess antioxidant and adaptogenic properties, which

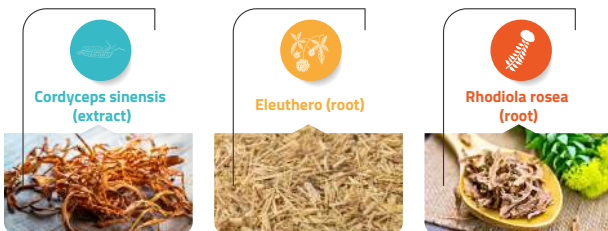

means they may help the body adapt to stress and avoid damage caused by the stress response.* The cordyceps sinensis in AdrenaVen™ are particularly potent because of our unique fermentation process. Fermented cordyceps unlocks complex bioactive compounds.

In addition to fermented cordyceps, AdrenaVen™ contains an expert-curated selection of non-GMO plant ingredients formulated to facilitate even more powerful adrenal-supporting effects. These include energizing rhodiola root extract, adaptogenic eleuthero root, and antioxidant-stimulating chlorella.*

Benefits

- Supports energy levels and may help address mental fatigue.*
- Exerts antioxidant effects, reducing oxidative stress in cells.*
- May promote an increased tolerance to stress.*

Botanical Blend

Highlights

- Features adaptogenic cordyceps (a mushroom-like fungus) that have been fermented for maximum potency.
- Includes an enhancing blend of botanicals including rhodiola root extract, eleuthero root, and chlorella.
- Rigorously tested for pesticides, heavy metals, and harmful additives.

Recommended Use

- Take 2 capsules at breakfast or before 2 p.m. or as directed by a health professional.
