

DELTANOL™

Advanced Antioxidant,
Bone & Cardiovascular
Support*

- ✓ Naturally sourced from the annatto plant
- ✓ Promotes cardiovascular and circulatory health*
- ✓ Provides support for healthy total cholesterol levels as well as LDL cholesterol levels already within the normal range*
- ✓ Promotes regulation of healthy metabolic functioning*

*These statements have not been evaluated by the Food and Drug Administration.
This products is not intended to diagnose, treat, cure or prevent any disease.

DELTANOL™ IS THE “21ST CENTURY VITAMIN E”

This excellent product features delta tocotrienol, the delta fraction of the vitamin E family that has the most significant properties for cardiovascular and circulatory health.*

Deltanol features delta and gamma tocotrienols that have been naturally sourced from annatto. Annatto comes from the nutrition-rich bean pods of the achiote tree, a majestic tree that grows mainly in warmer climates.

This products is not intended to diagnose, treat, cure or prevent any disease.

Tocotrienols have been well researched for their antioxidant activity, which can fight free radicals to protect cells.* Research supports evidence that tocotrienols may have even more powerful antioxidant properties than tocopherols (such as the typical type of vitamin E).*

Although normal metabolic processes of the body can contribute to certain amounts of free radicals, the body may be exposed to an excess production of free radicals caused by ongoing exposure to pollutants, toxins and other stressful factors. High levels of free radicals in the body can damage cells and break down their membranes, which is why the remarkable antioxidant capability of tocotrienols is so valuable.*

Delta tocotrienols is a key part of the vitamin E family, which consists of four tocotrienols - alpha, beta, gamma and delta. However, it is the delta fraction, called delta tocotrienol, which demonstrates the most significant properties for cardiovascular and circulatory health.*

This product offers truly superior lipid-based nutritional support.* Unlike tocopherols, Delta tocotrienols have an outstanding potential to provide support for healthy total cholesterol levels as well as LDL cholesterol levels already within the normal range.*

They also promote regulation of healthy metabolic functioning, and support the inner lining of blood vessels which are comprised of endothelial cells.* Research also shows that tocotrienols promote healthy levels of coenzyme Q10 in the blood.*

the world leader in cellular resonant formulations

MADE IN OUR WORLD CLASS MANUFACTURING FACILITY FOR SUPERIOR QUALITY ASSURANCE:

- ✓ **cGMP** (we meet and often exceed FDA requirements) with our exceptional, well trained manufacturing staff
- ✓ **Advanced** lab testing at our state-of-the-art laboratory with highly trained scientists
- ✓ **Delivering** exceptional quality products since 1987

PREMIER INGREDIENT QUALITY

Our ingredients are purchased **solely for quality in terms of purity, potency and premier resonance capacity**. They are sourced only from the finest qualified suppliers all over the world, including Europe, South America, India, China and many other countries. Because of our rigorous quality testing standards, we must reject the vast majority of materials.

Our sourcing team has traveled to many countries, ever in pursuit of the elusive **pristine quality of nutritional ingredients**. For example, they have traveled to the central forests of India to find the best source of noni, to Italy to personally examine aloe plants and to South Africa to study tribal plants.

ADVANCED INGREDIENT TESTING

PRL conducts scientific laboratory testing of raw materials and finished products, as well as state-of-the-art, proprietary bioenergetic testing of all ingredients. PRL has pioneered the use of bioenergetic testing to **ensure the customer is consistently getting the best quality** worldwide. In addition, we use the most advanced lab equipment and test methods, such as HPLC (High Performance Liquid Chromatography), to assure the potency and reliability of every ingredient.
